Zack Projects: Company Website

Pretoria - South Africa

Developed a website for a small construction company based in Pretoria that specializes in tiling, paving, building houses, electricity, and plumbing. The website provides an overview of the company's services, past projects, and customer testimonials. It includes a contact form for potential clients to inquire about services and request quotes.

Currency Exchanger: Web Application

Pretoria - South Africa

Developed a web application that allows users to check real-time currency exchange rates between two currencies. It is built using HTML5, CSS, and JavaScript for the frontend, and C# with ASP.NET for the backend. The website integrates with the Alpha Vantage API to fetch exchange rate data. Users can enter currency codes to assess the exchange rates between their selected currencies.
